

Hydrotech[®]

Motion Control Solutions

Innovative Ideas. Technical Expertise. Engineered Solutions.

Field Service & Repair

Distribution | Engineering | Integration | Service

Hydrotech's Field Service & Repair group provides complete hydraulic repair service.

Using cutting-edge diagnostic equipment, our service/hydraulic repair technicians evaluate performance characteristics after the repair and recommend additional solutions. Hydrotech, Inc. has developed a very advanced Field Service & Repair program to bring our technicians and technology to you. With sophisticated Data Acquisition hardware and software, we can diagnose problems, troubleshoot your system and perform repairs at your location. Field Service & Repair includes troubleshooting, repair and preventative maintenance, plumbing, installation and startup services, as well as custom filtration and contamination testing and oil analysis, including particle counts.

Our factory trained service technicians have countless years of experience repairing and evaluating hydraulic equipment and continually broaden their expertise by attending factory training programs. You can be sure to receive a product that will work once it has been reinstalled into your system. Whether you need a Servo/Proportional, directional valve or piston pump repaired, Hydrotech's Field Service & Repair group is ready to assist you with any of your repair needs.

Providing Long-Term Solutions:

Our technicians work to diagnose the source of the problem and recommend solutions to prevent future component and system failures and maximize equipment productivity.

Prompt Communication:

From tear-down to inspection, through service completion, the Field Service & Repair Group is committed to communicating the status of your service order and seeking your input. Because of our strict standards, you can rely on Hydrotech to do the job properly the first time.

Attention to Detail:

Field Service & Repair group completes a detailed failure analysis on each unit we service. Customers are informed of probable causes, potential solutions and available options and can then decide whether the best decision involves repair or replacement. Our attention to detail saves your company money now and in the future.

Warranty on Repaired Items:

Hydrotech's Field Service & Repair group warrants its repairs to be free of defective materials and workmanship. This warranty period is equal to the original manufacturer's new warranty from date of invoice. Hydrotech technicians are factory trained and authorized to perform warranty service on industrial and mobile components by Rexroth.

Hydrotech® is a fluid power/motion control distributor and solutions provider operating in Ohio, Kentucky, and portions of West Virginia and Indiana.

Does Your Solutions Provider Do All This?

Automation Technologies

Our Automation group provides engineering design assistance and technical support for all your automation & control needs. Products include linear bearing systems, gantry style robotic systems with HMI interfaces, and a full line of servos and controls. Our mission is to optimize motion control systems for the best time, cost, and lifecycle management. We can also provide project design and assembly for modular framing structures.

Standard & Custom Power Unit Systems

Hydrotech provides horizontal, horizontal JIC, vertical, overhead, L-style, or other custom power units with special design reservoirs, valves and accessories installed and piped. Rexroth Standard systems to 100 gpm. Complete turnkey central and custom units with flow to 9,000 gpm and pressure to 10,000 psi with world-class engineering for low noise. We also provide AC and DC power units, AC miniature power units, and DHP power packs.

Engineering, Installation, Start-Up & Assembly

Hydrotech designs using 3D cad software, builds, installs, and does start-up on all hydraulic, pneumatic, lubrication, and motion control systems regardless of where purchased, using fully qualified tech teams. Our trucks feature on-board generators and a full stock of materials to set up shop anywhere. Trucks are outfitted to plumb up to 2" seamless steel and stainless steel tubing on flared, bitetype, or face seal type connections. We also cut and crimp up to 2" high pressure hose.

Field Service & Repair

Factory trained technicians available 24/7 for troubleshooting, fluid analysis, and sampling on-site repair services, field upgrades and retrofitting, or high pressure plumbing services. We repair any manufacturer's hydraulic component, fully tested to specifications, and meet your operating requirements. We are authorized Rexroth and Lincoln Industrial repair centers. On-site telescopic cover repair. Specialists in piston pump/motor, servo, and valve repairs.
