

DHP

POWER PACKS

Innovative Ideas. Technical Expertise. Engineered Solutions.

DHP is a division of

***We take great pride
in manufacturing superior compact hydraulic solutions
tailored specifically to your needs.***

Whether your needs are hydraulic cylinders, custom manifolds, or a complete hydraulic system with controls, we can help you achieve the most cost-effective solution.

Our products can be designed to endure the harshest environments while maintaining high reliability and long life. Our engineers are geared up to accept any challenge your application may present.

Innovative design, advanced 3d CAD software, and use of the latest machining techniques allows DHP to supply top quality products at competitive prices.

Our products are produced under the ISO 9001:2008 quality assurance system, which demonstrates our continued commitment to quality and customer satisfaction.

DHP has an extensive sales & support team ensuring there are competent, reliable people ready to assist in the design, supply, and support of our systems.

Continuous investment in research and development, advanced design software, simulation tools, and manufacturing technologies ensures that DHP is the leader in new product development.

We can also provide fast-track design and rapid proto-typing for your application as needed.

DHP
